Get off of Microsoft' case. Once again government is wrecking a vibrant US industry, just like they did the Automobile Industry (where I made my living).

This is NOT about protecting the consumer. Even the DUMBEST person knows that you are not abusing the customer by giving something away something for free. It just can't happen.

This case is about "wanna be's" spreading money around Washington, and Washington sucking it up just like they always do.

Somewhere this has to end..... End It !!!!!!!!!!!!!!!

I hope Gates moves his business to Canada just to show you idiots
!!!!!!!!!!!!!!
